

MODERN TECHNOLOGY CAN LOOK THIS GOOD

Accessories and add-ons for the AirWave1 and AirWave2

With original accessories from FLOETER, your AirWave machine becomes even more valuable. The long lasting and carefully thoughtout modular accessories allow you to transform your air cushion machine into an automated production line for outstanding packaging. With the ergonomic additions, you can increase your productivity and increase satisfaction at the packing station.

AirWave1 and AirWave2 Accessories

AirWave overhead unit

FOR AUTOMATION OF PRODUCTION

Place the air cushions at an ideal height for grabbing while also creating more space and freedom at the packing station. With Bluetooth control, sensors and lifting column. Perfect ergonomic coordination.

Rolling basket

WITH FULL SENSORS

The rolling basket is mobile and always brings your air cushions to the ergonomically correct working height. They can be simply picked up rather than continually bending over.

Docking station

FOR DISTRIBUTED USE

Here is where your AirWave shows what it can do. No volume is too large for a fast filling. The rolling basket are filled one after another thanks to the fast operation and are immediately available and mobile.

Rolling basket ECO

LIGHTWEIGHT VERSION WITH A TEXTILE BAG

AirWave – Rolling basket ECO (made of canvas, without sensor) The universal air cushion rolling basket is mobile and always brings your air cushions to the correct working height. Ideal for the production of air cushion with a width of up to 500mm.

AirWave coiler unit (420/600mm)

FOR PRODUCING ENDLESS MATS

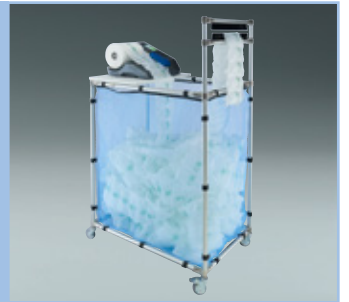

Use your air cushion machine with the mobile coiler unit. Ideal for the production of wide type 8 air cushion mats at an ideal height for grabbing. The mobile winding unit has an integrated sensor which stops winding once the maximum coiler size has been reached.

Rolling basket light

WITH FULL SENSORS

AirWave Rolling basket light – the lightweight version with sensor and a textile bag. The rolling basket light brings your air cushions to the ergonomically correct working height. They can be simply picked up rather than continually bending over.

Jumbo roll holder

FOR LARGE DEMANDS

Up to 3000 meters on a single roll? No problem with the jumbo roll holder. Produce large quantities of air cushions with few roll changes. Ideal for all container and overhead solutions.

Foot pedal

HANDS-FREE IN THE PACKING SHOP

If the machine is located in a location that is difficult to access or you simply don't have a hand free, the foot pedal is a valuable solution.
